Desideri "le città di latte"

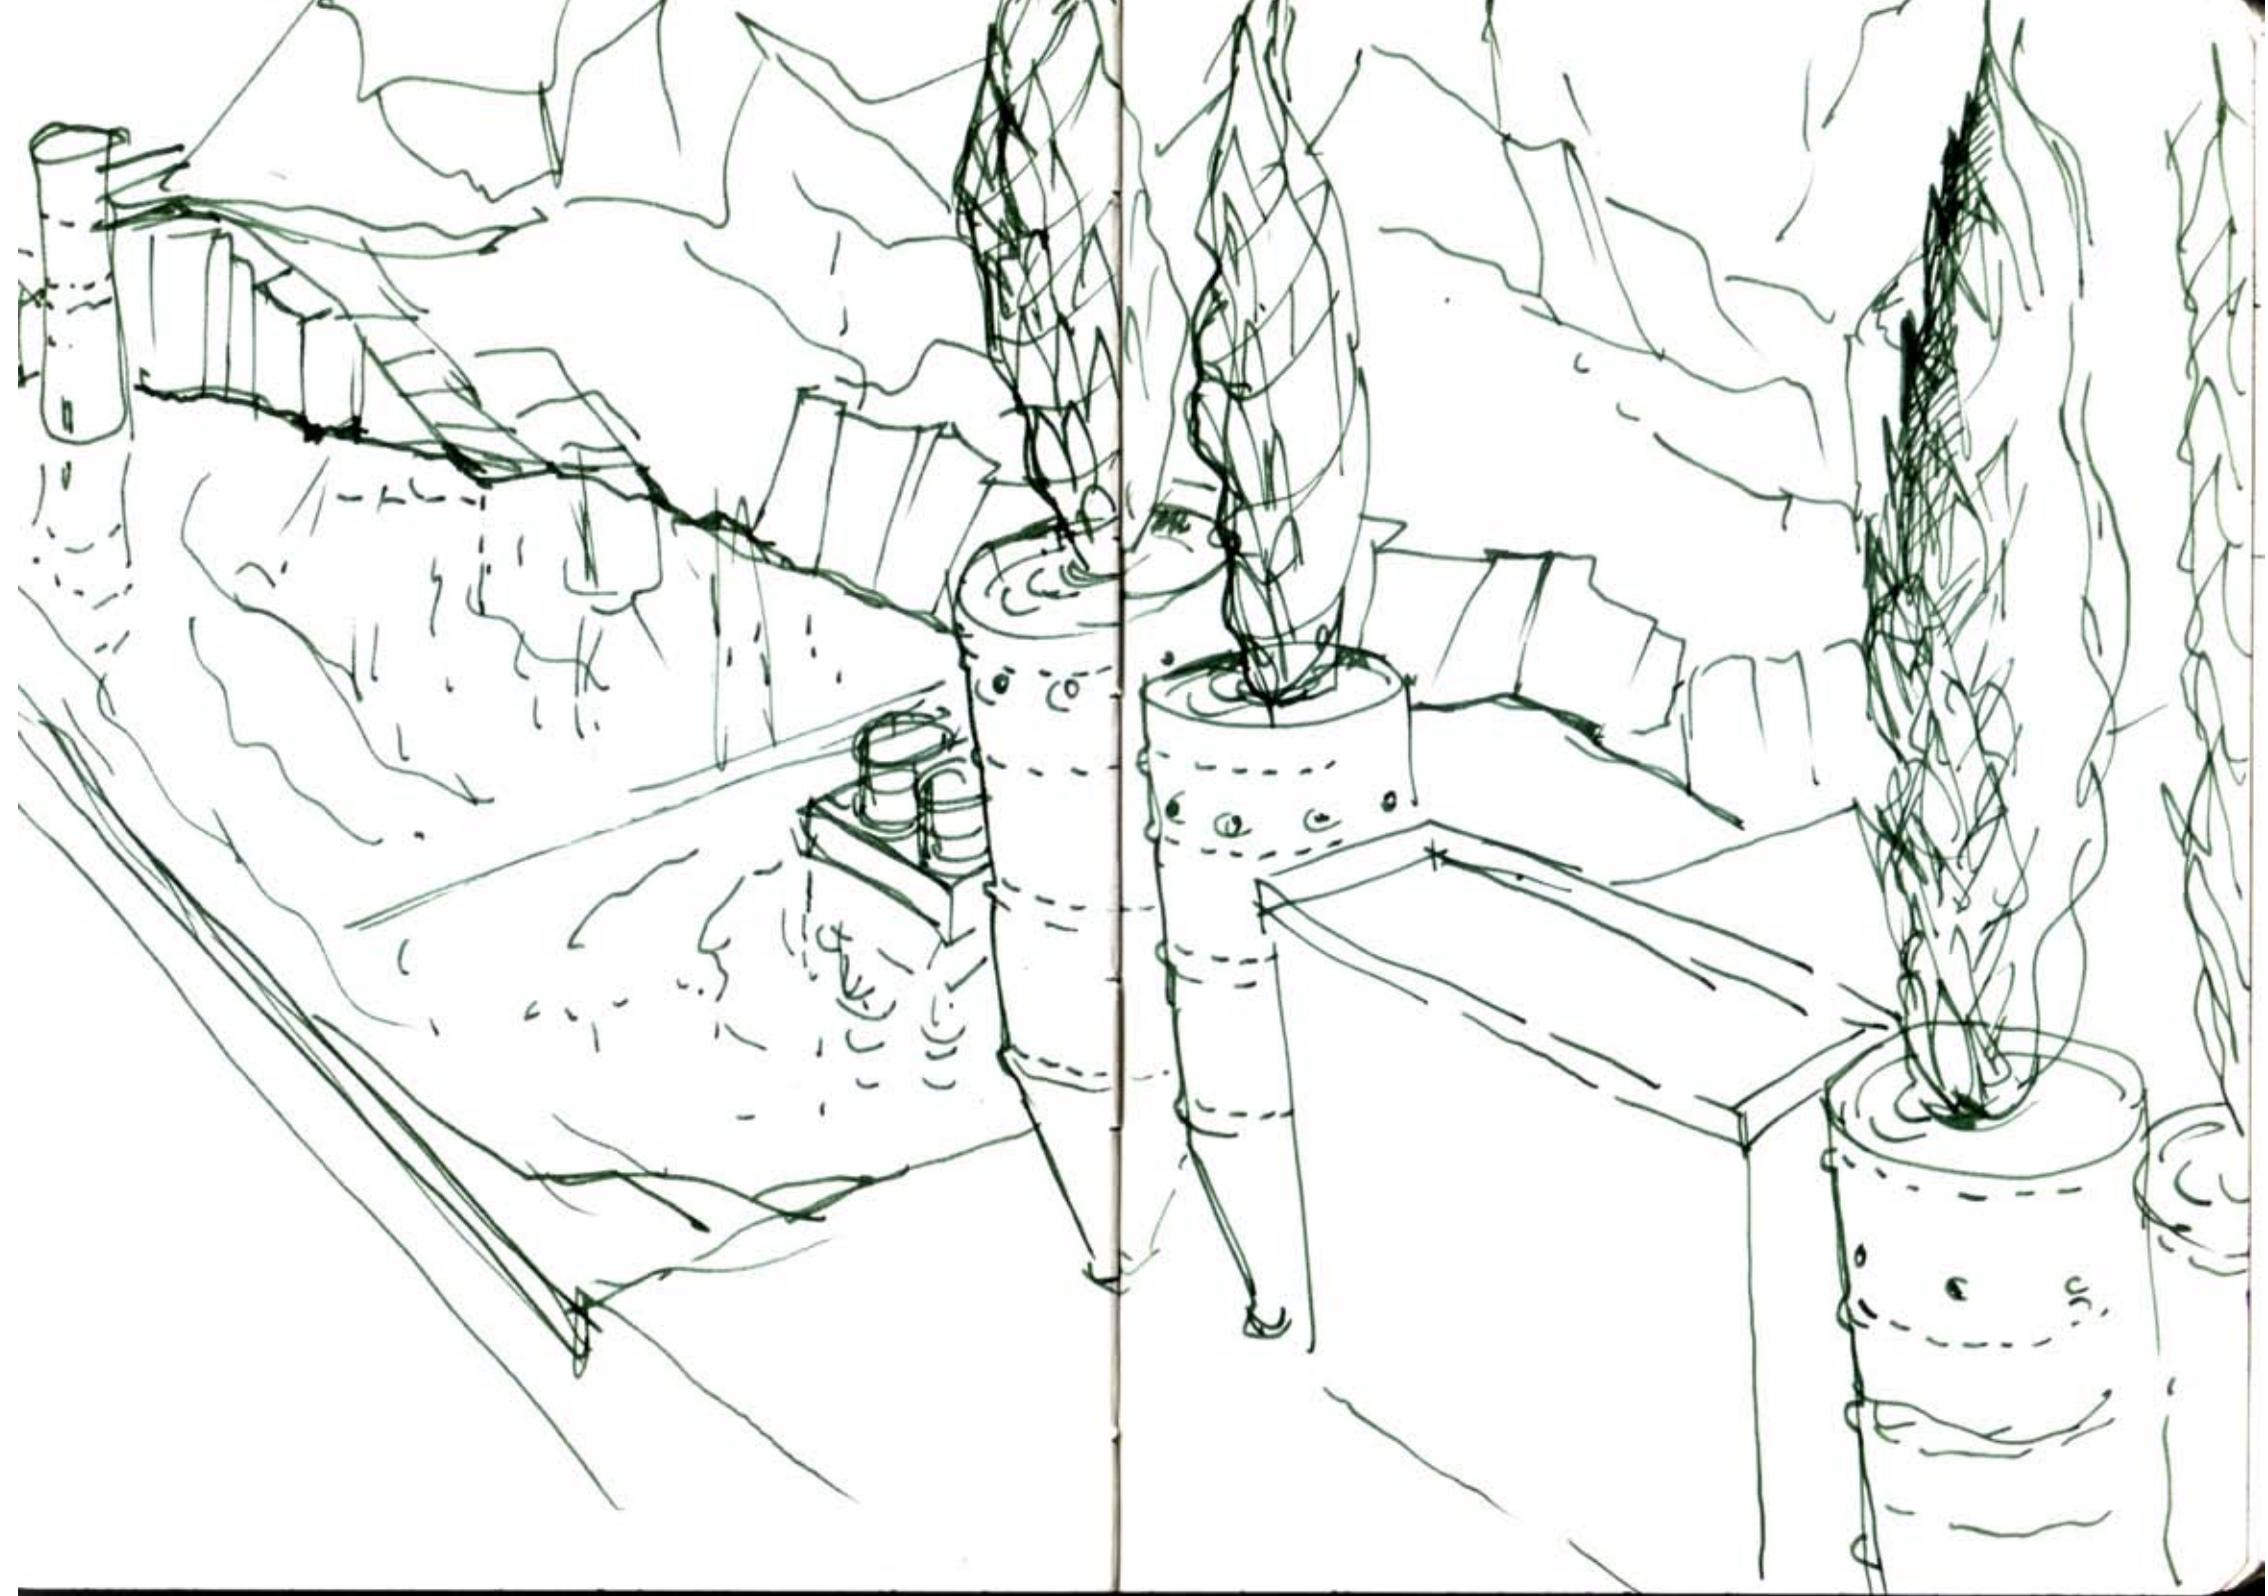

Materiale dell'Architettura
che non sono edilizia
- naturalezze delle cose

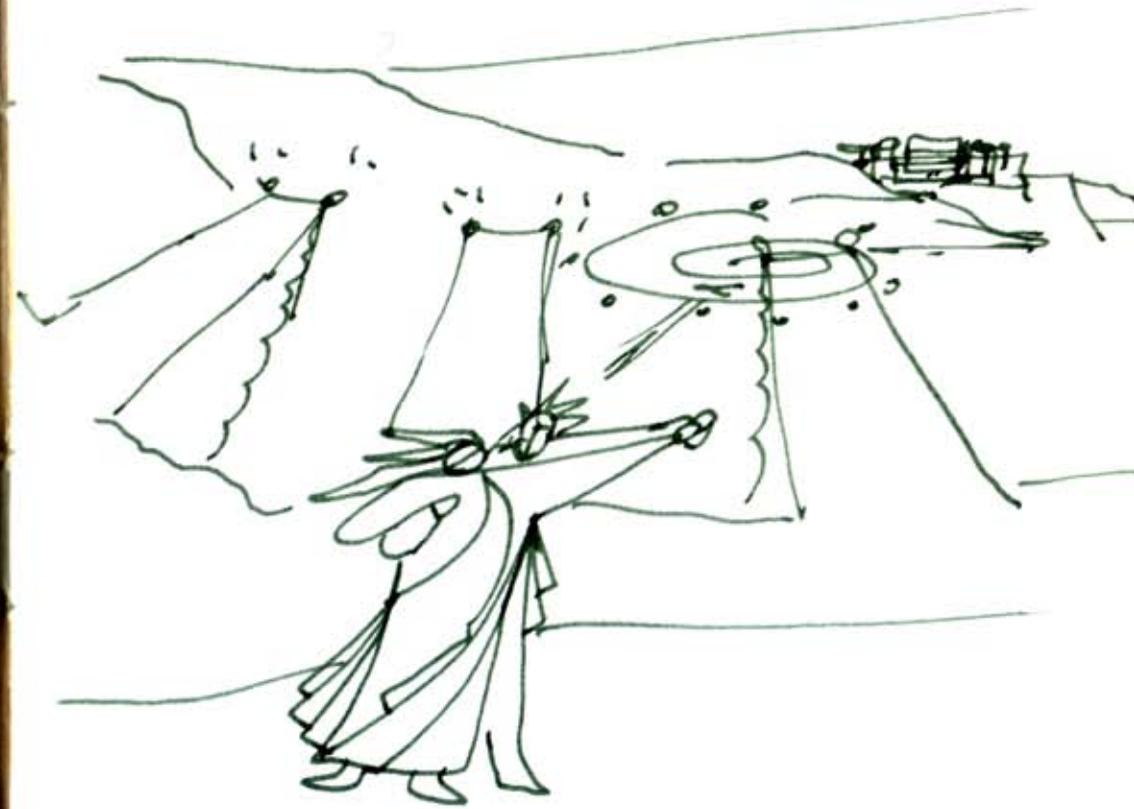

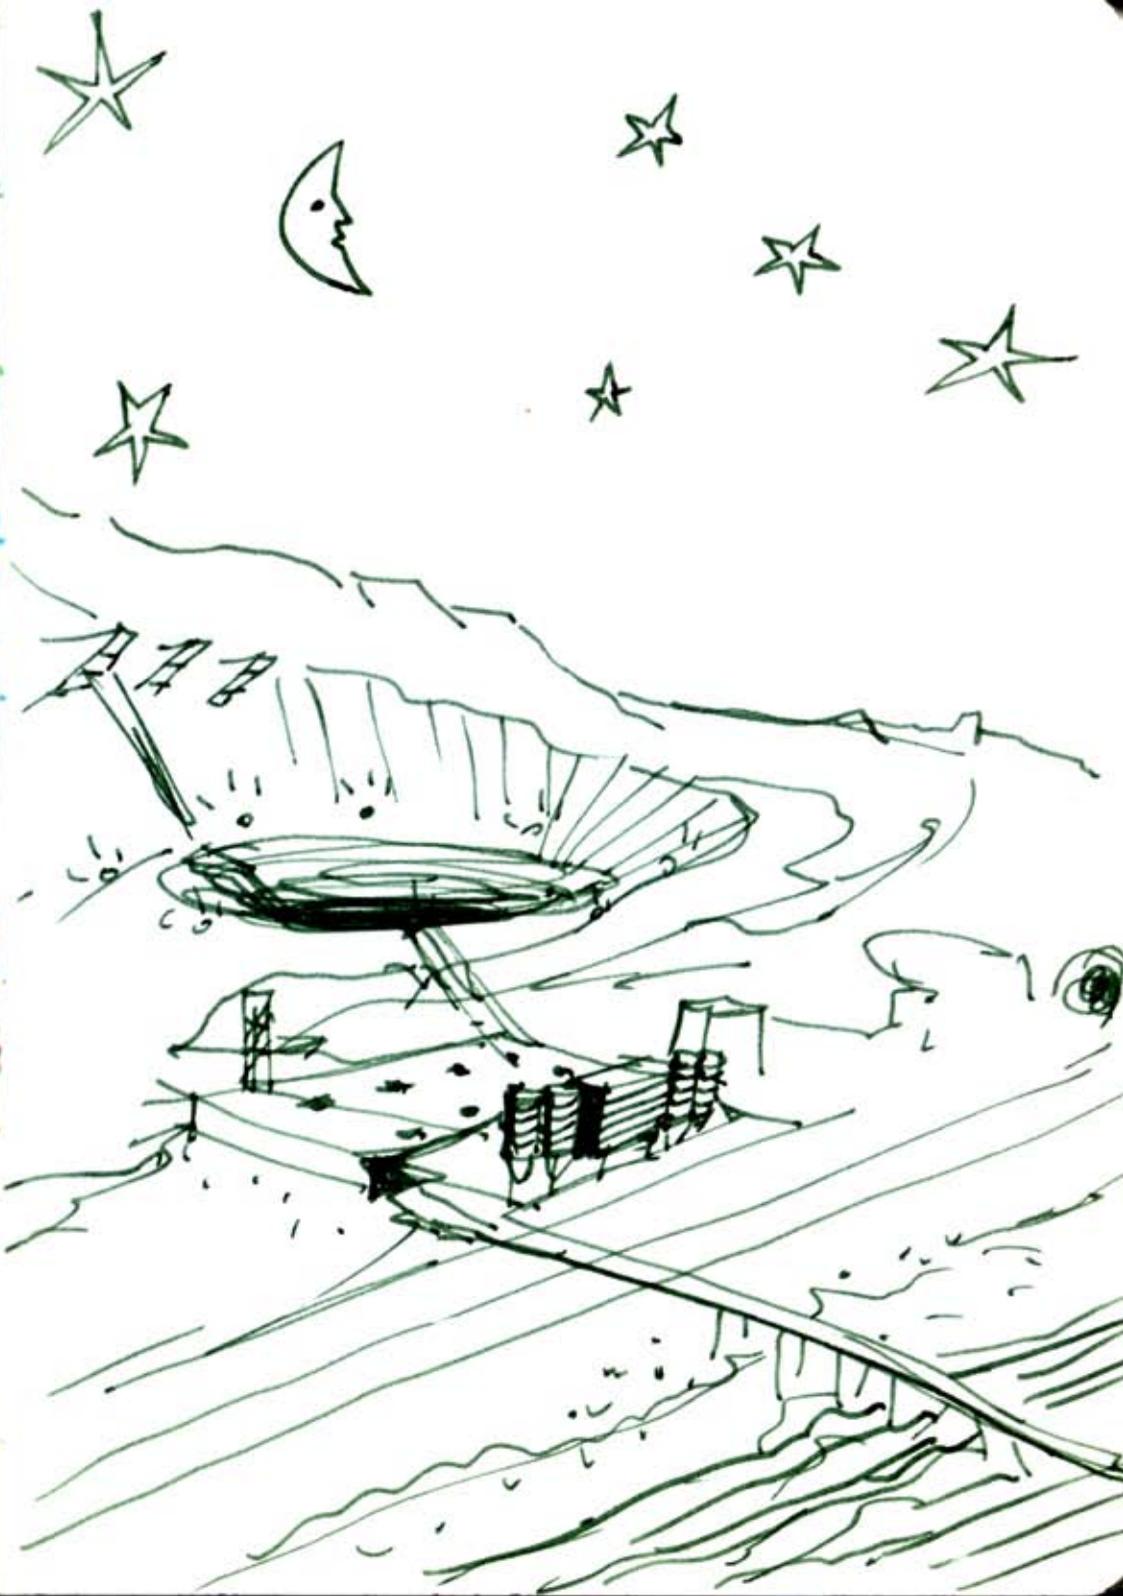

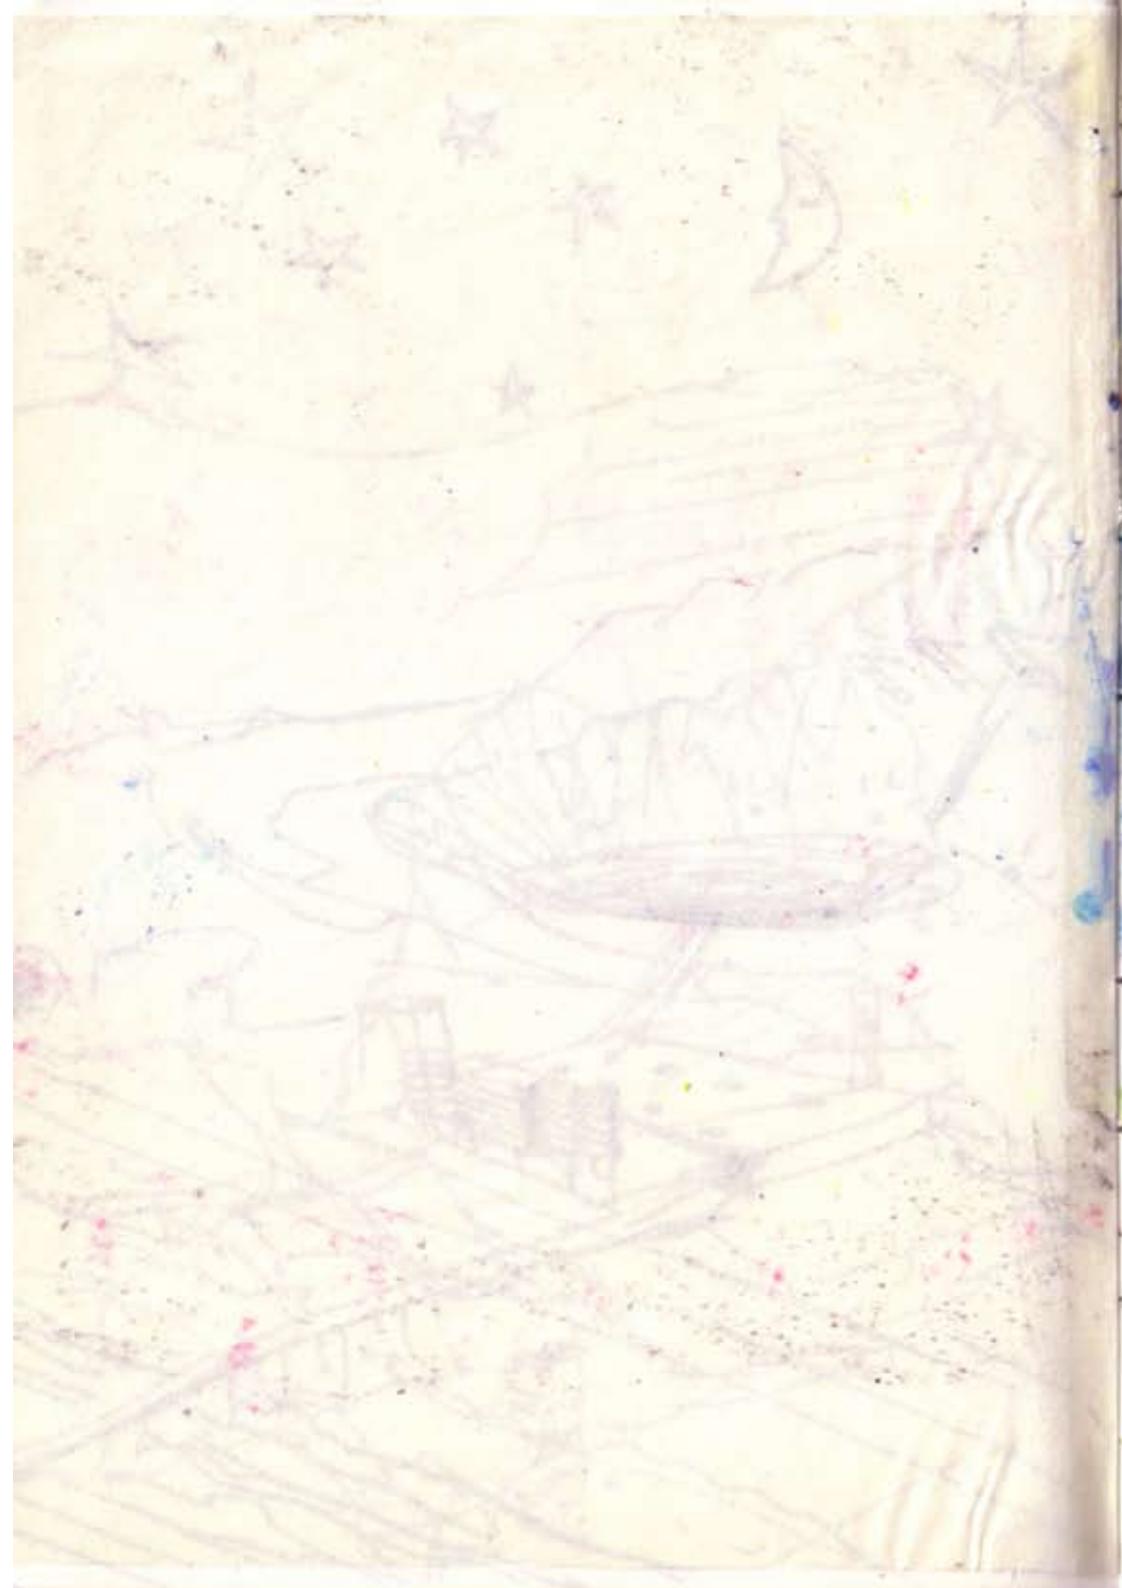

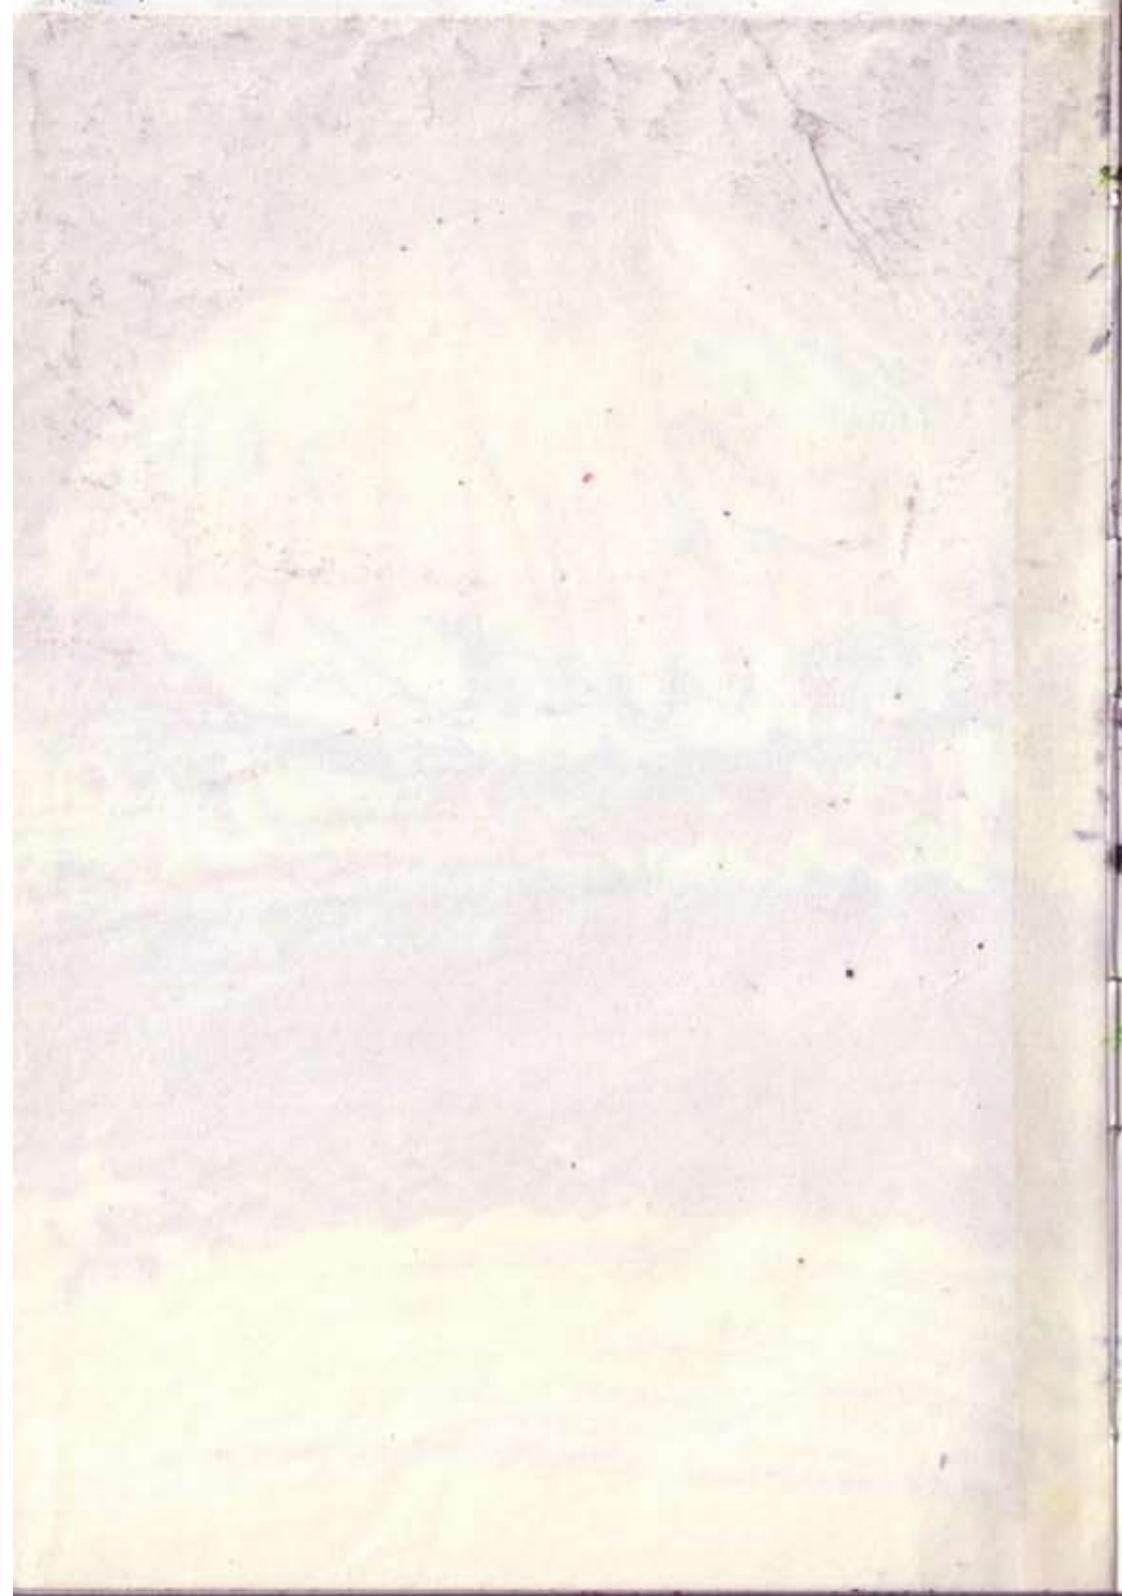

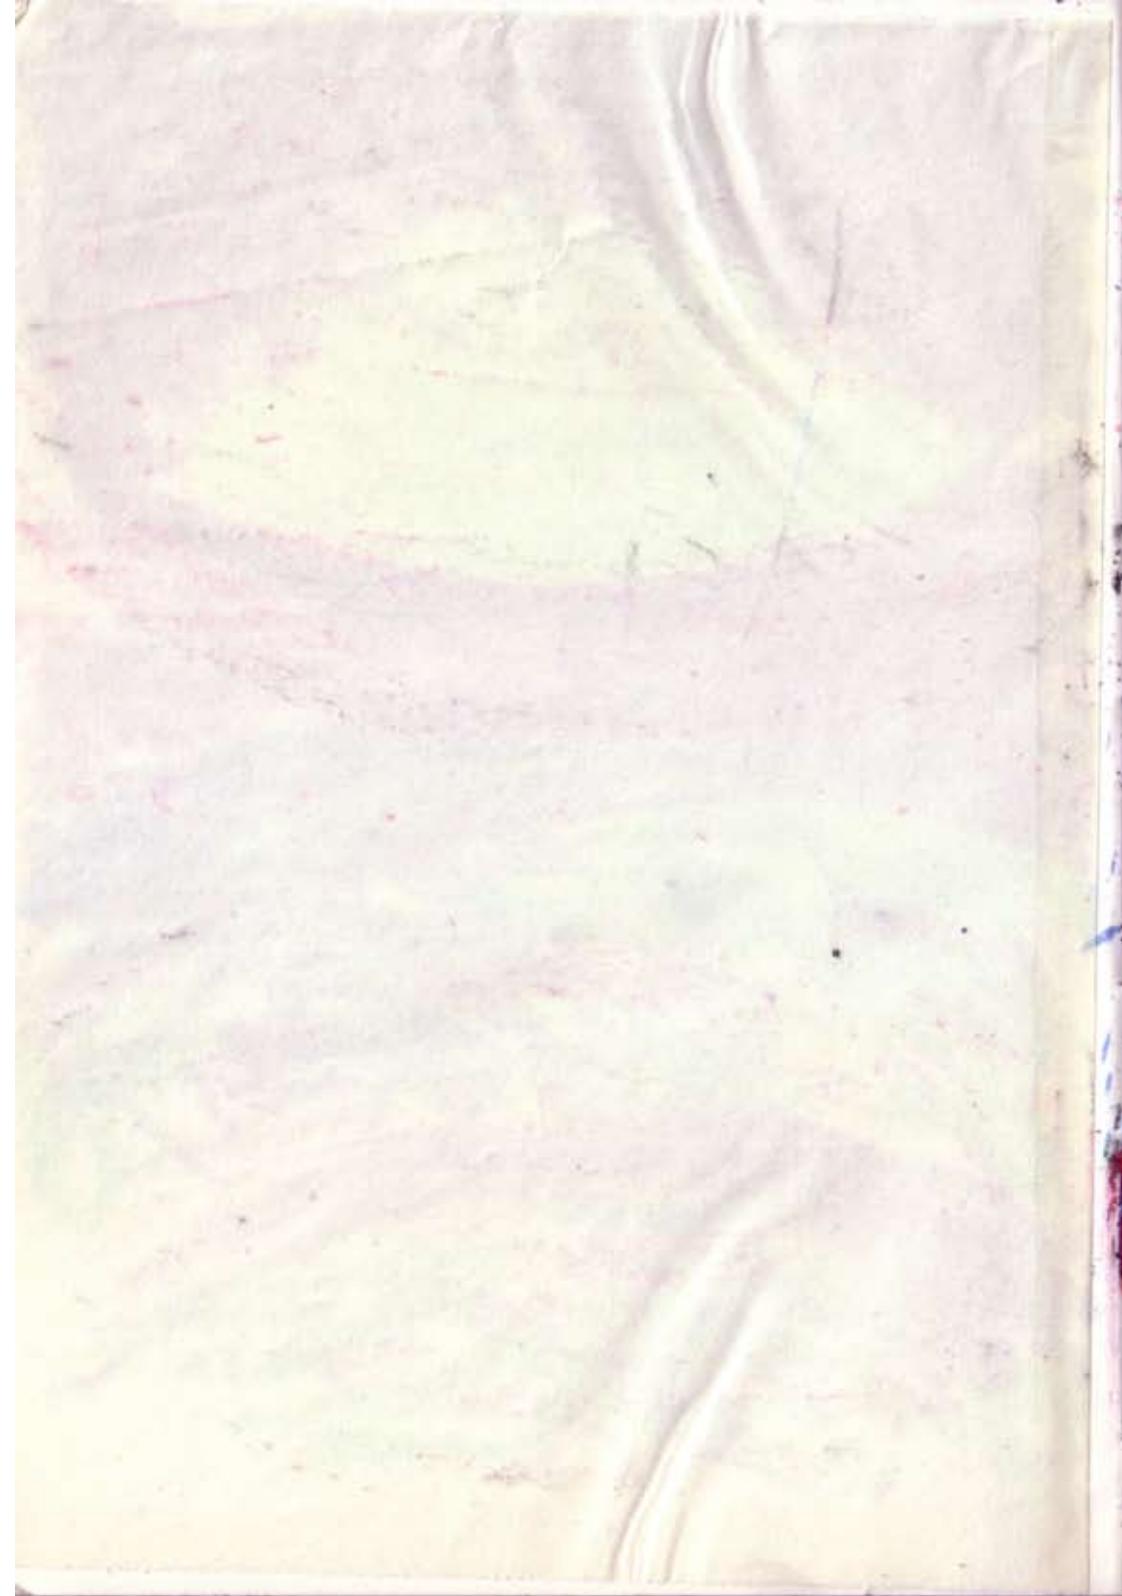

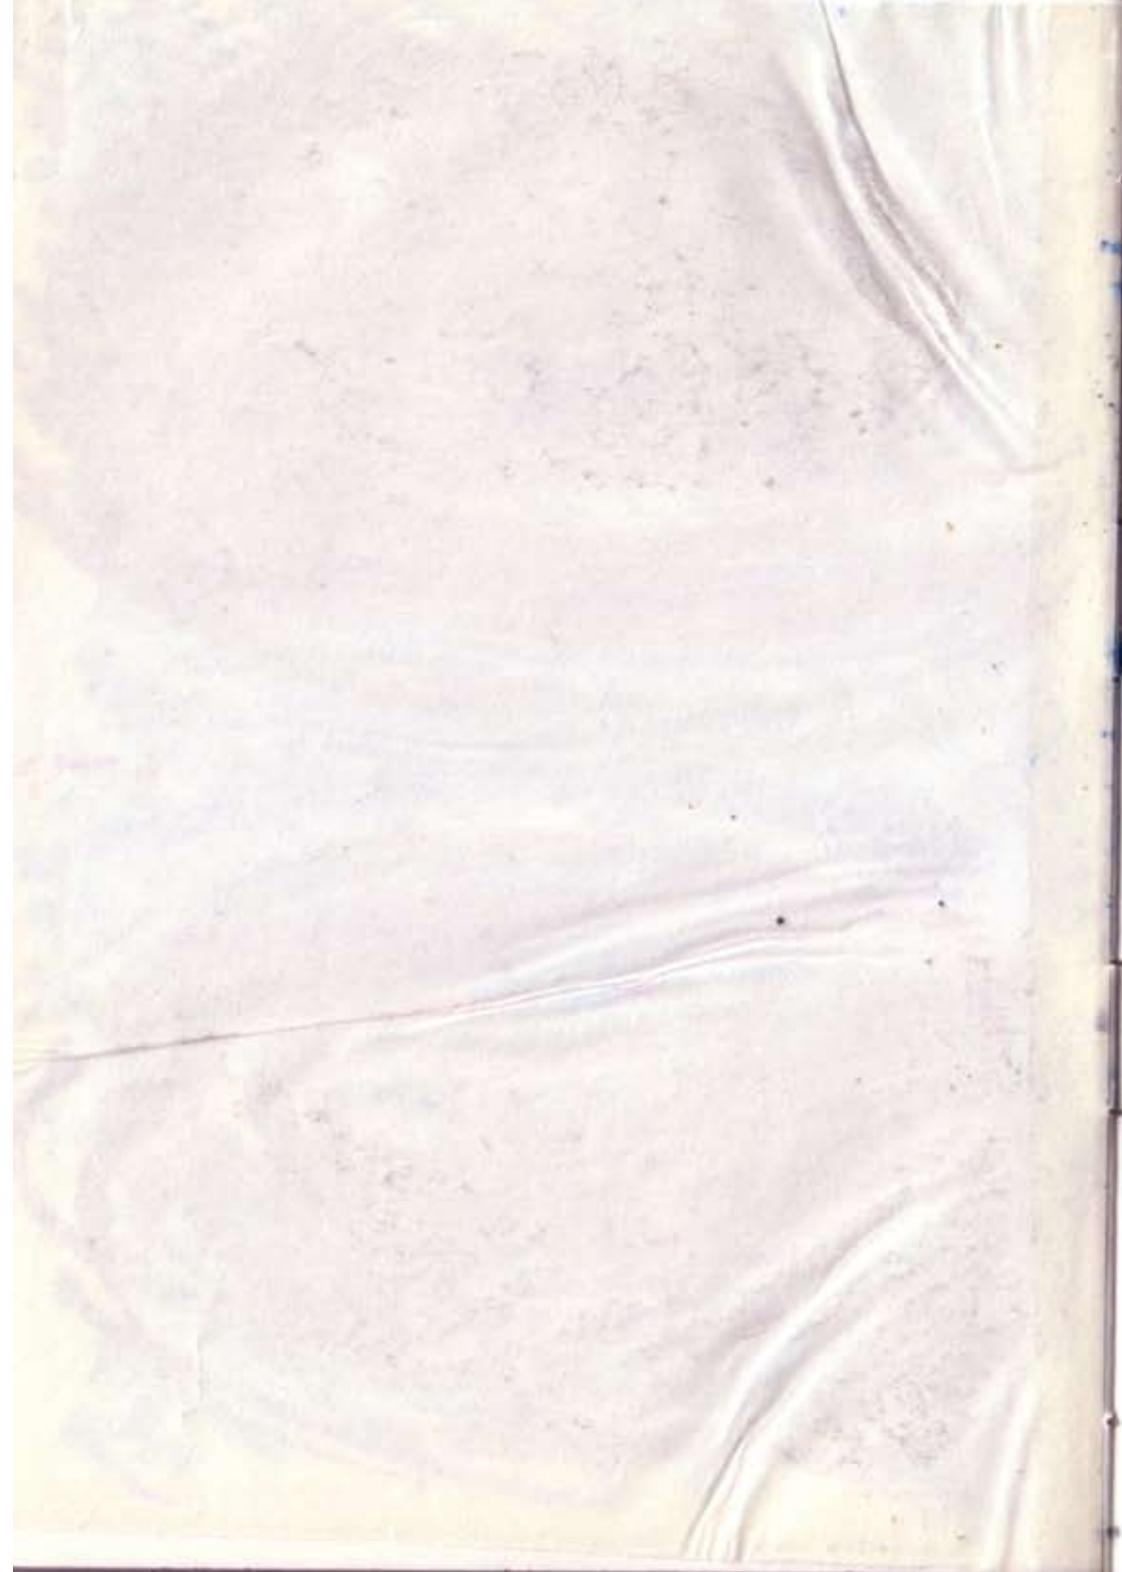

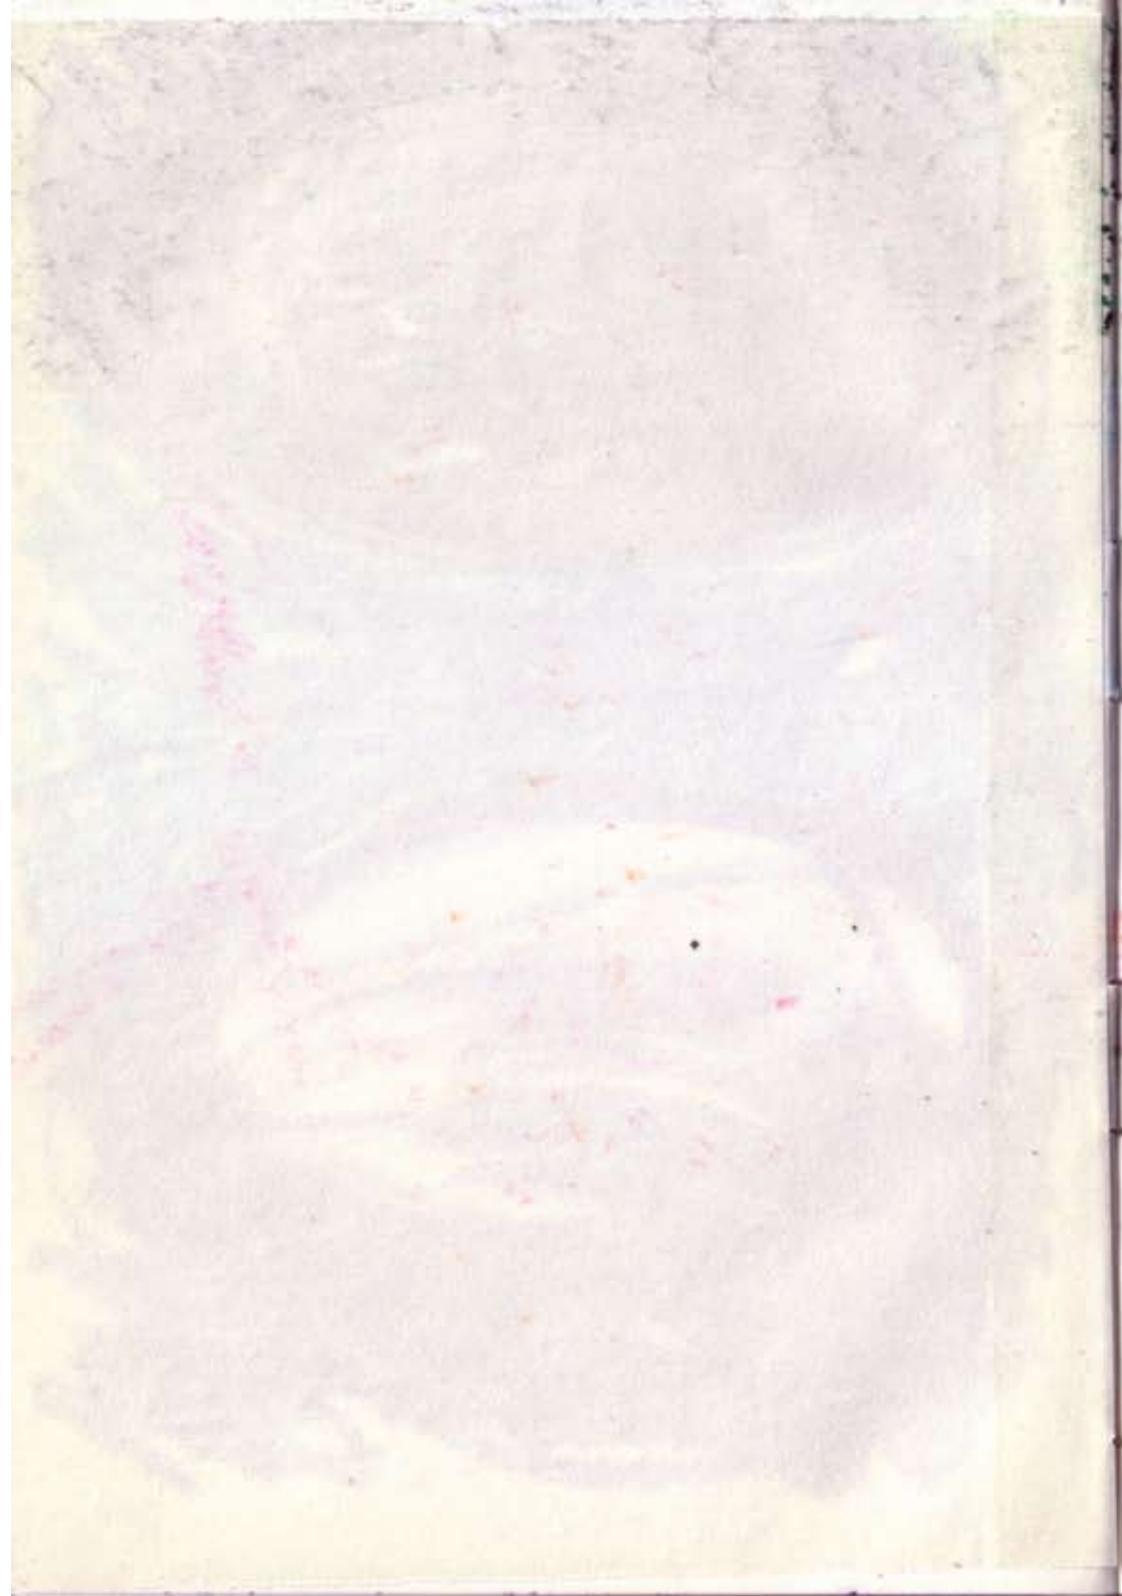

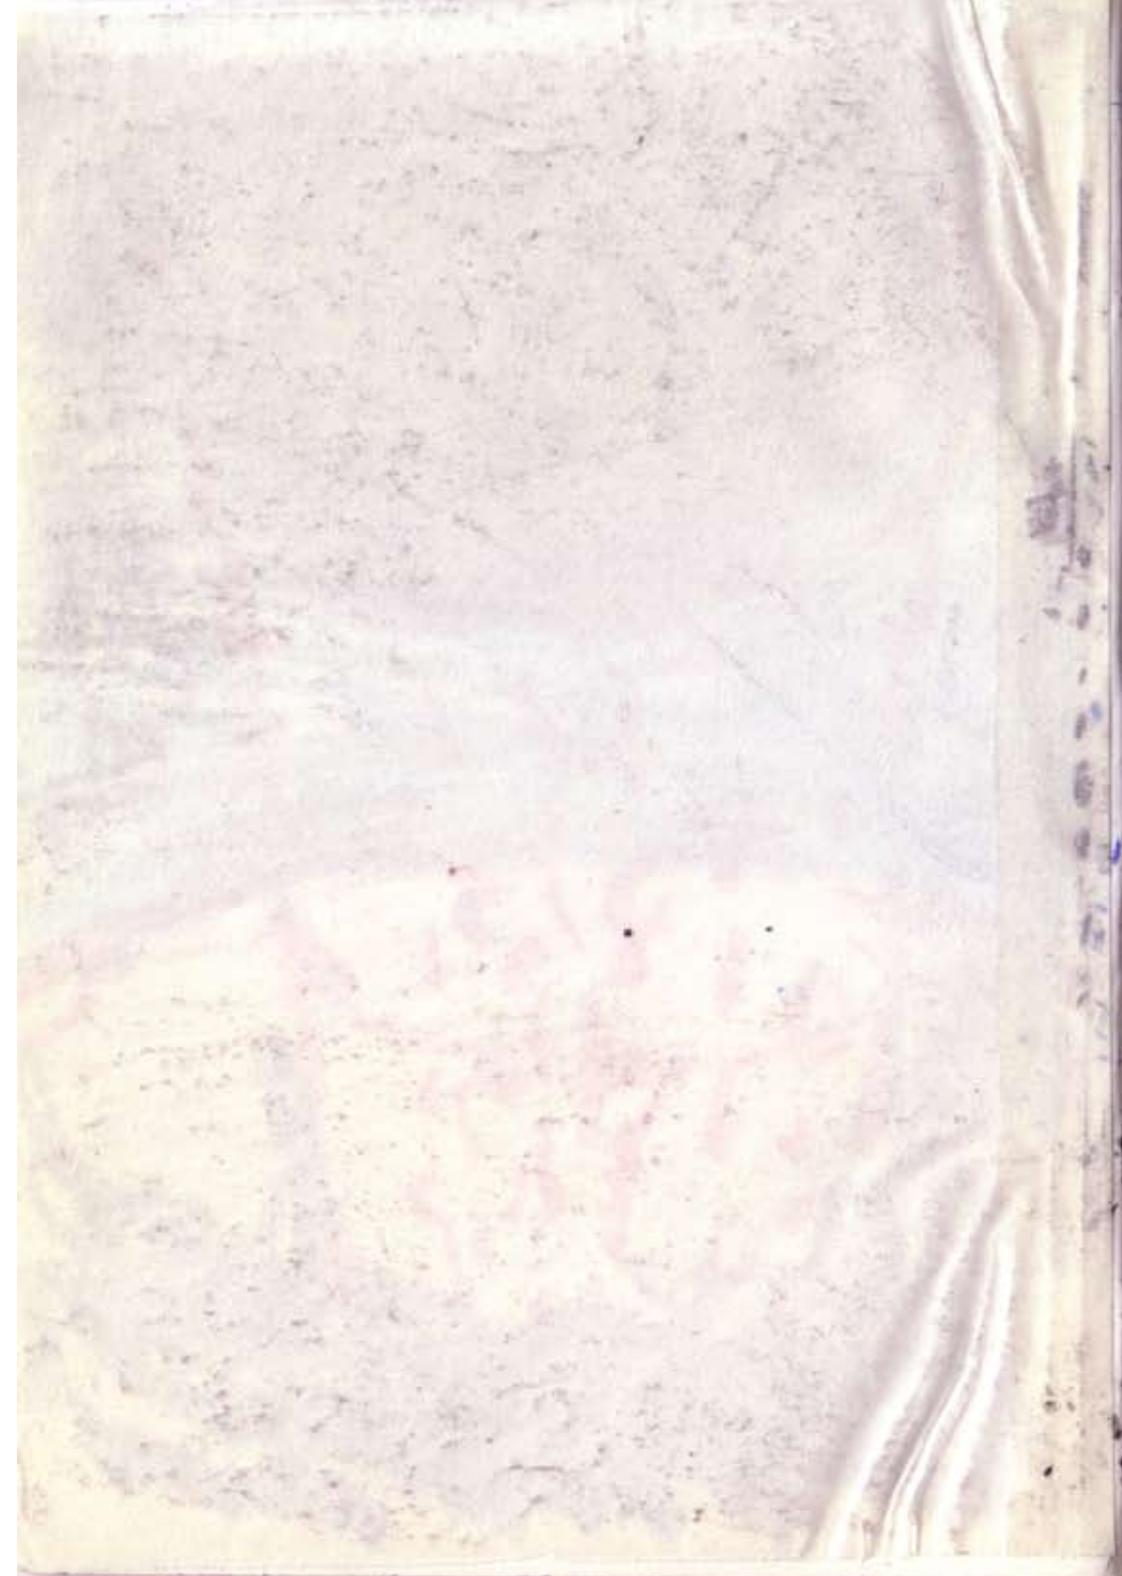

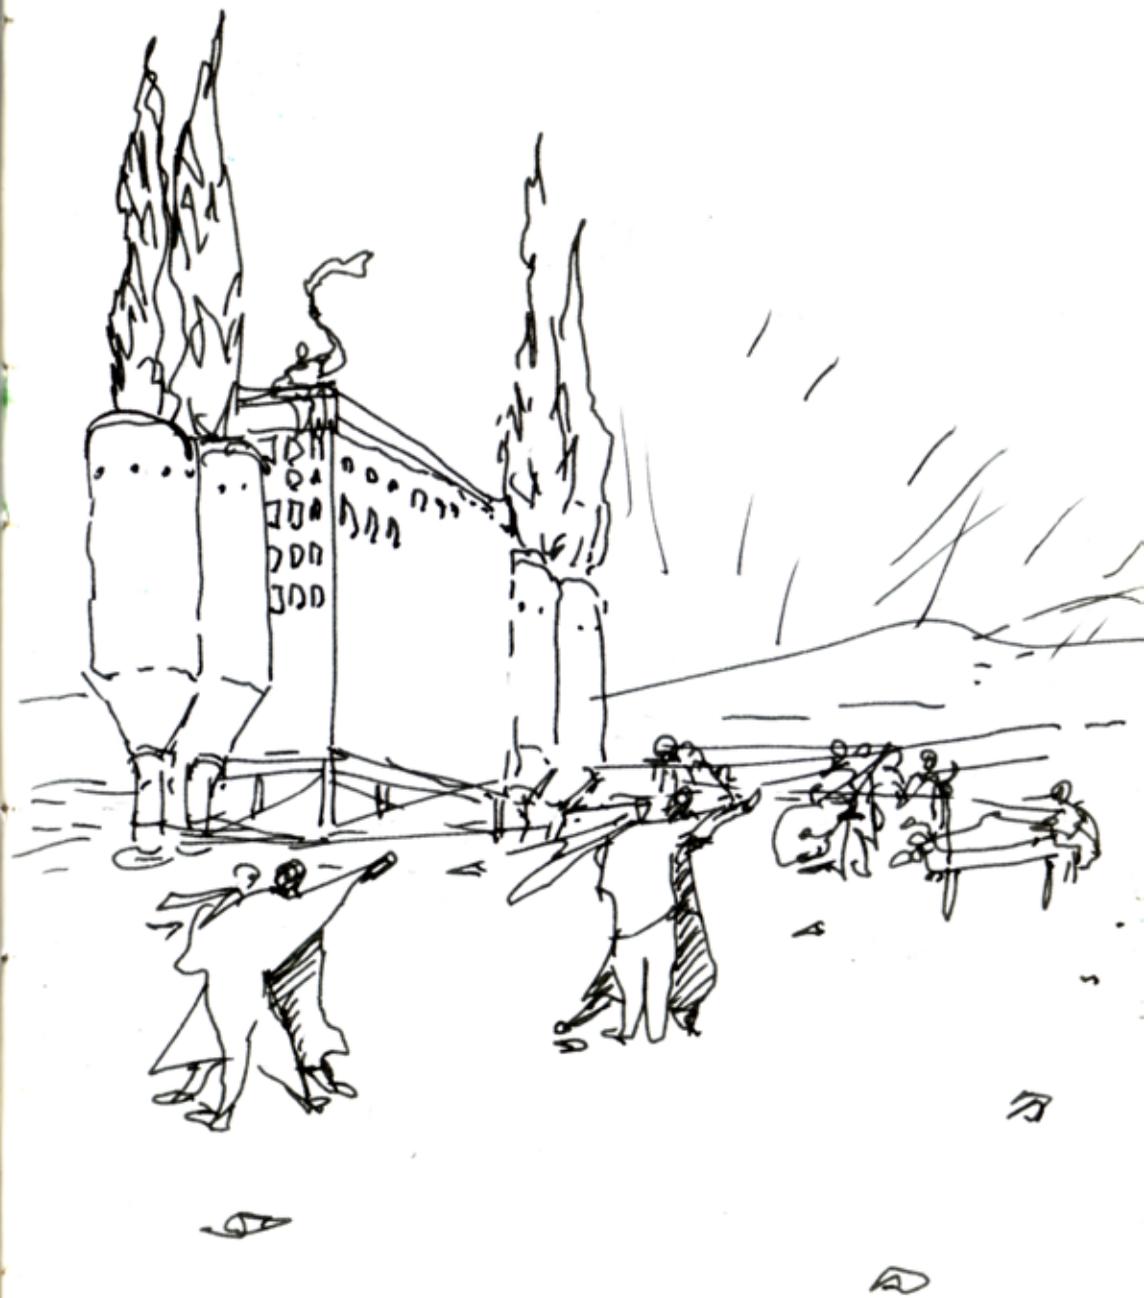

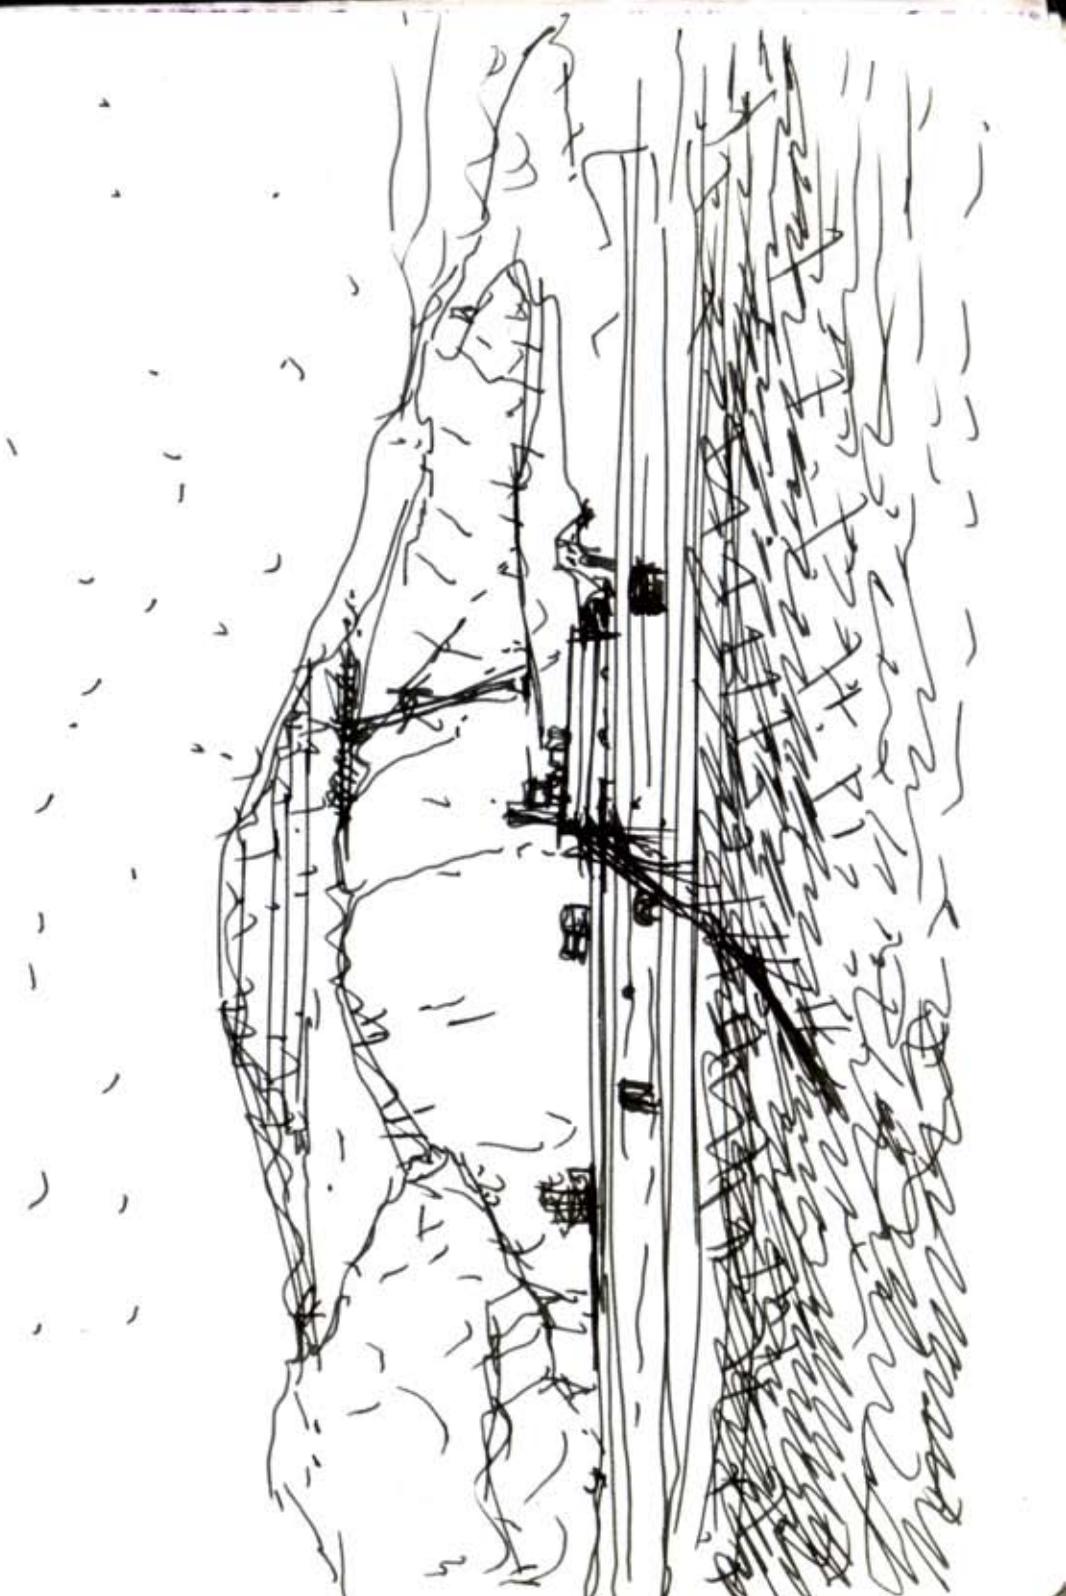

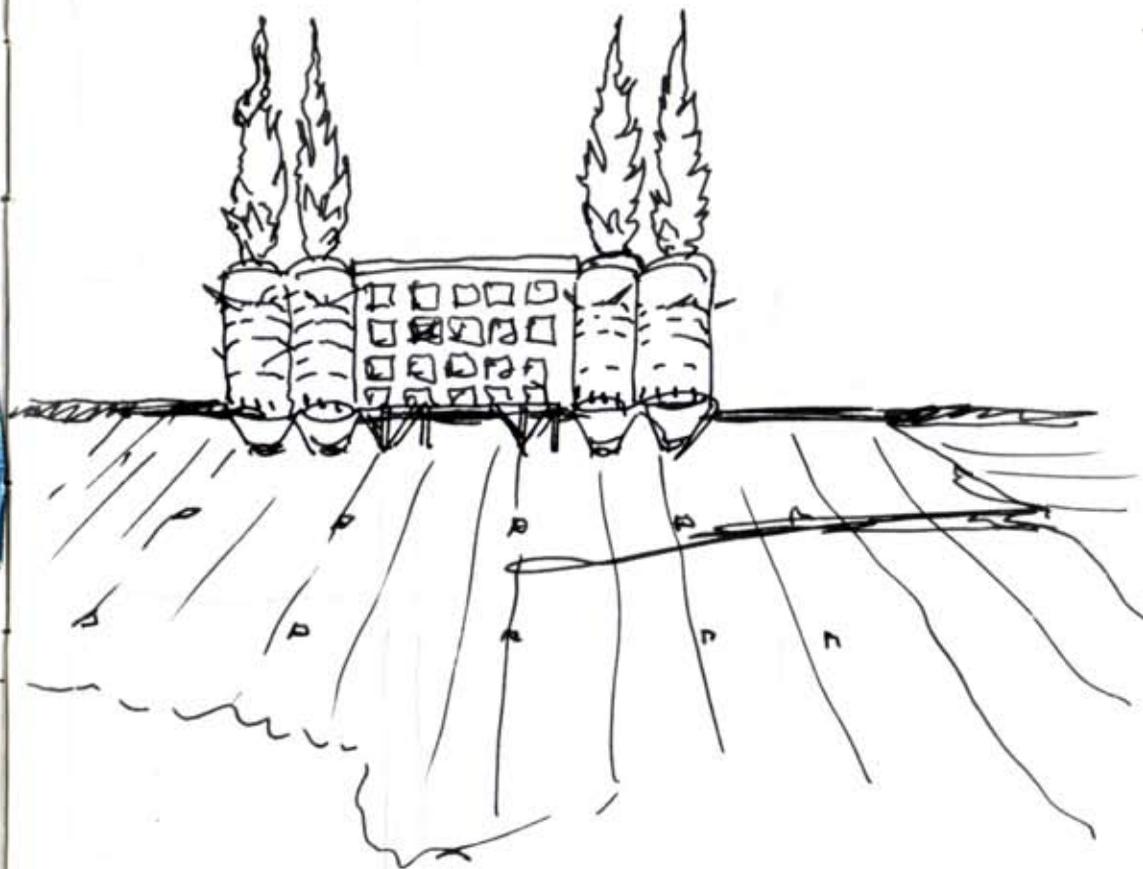

avventure ...

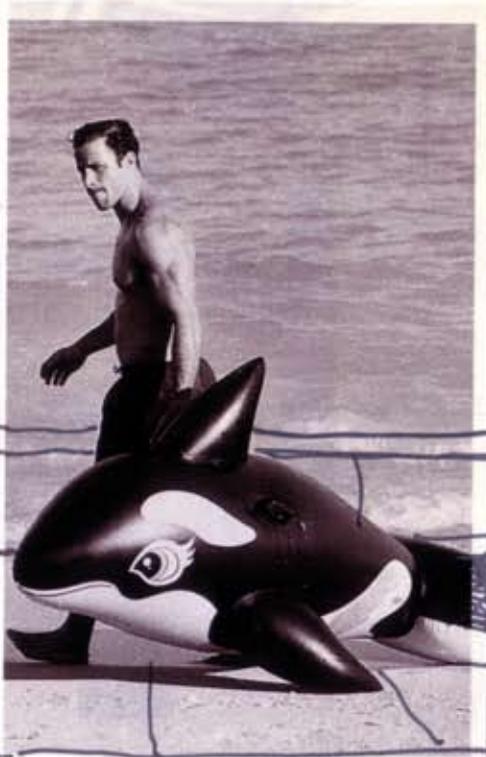

Sopra aperi, come appollaiati
gabbiani gruppi di luofm
per abitare stazionano
sulla roccia per scovare
una possibile vite.

Il Vento caldo di serocco
vibra tra le ferme e ruote
portature ... qui si può ascoltare
ancora il suono delle
netture e il silenzio delle
notti d'estate.

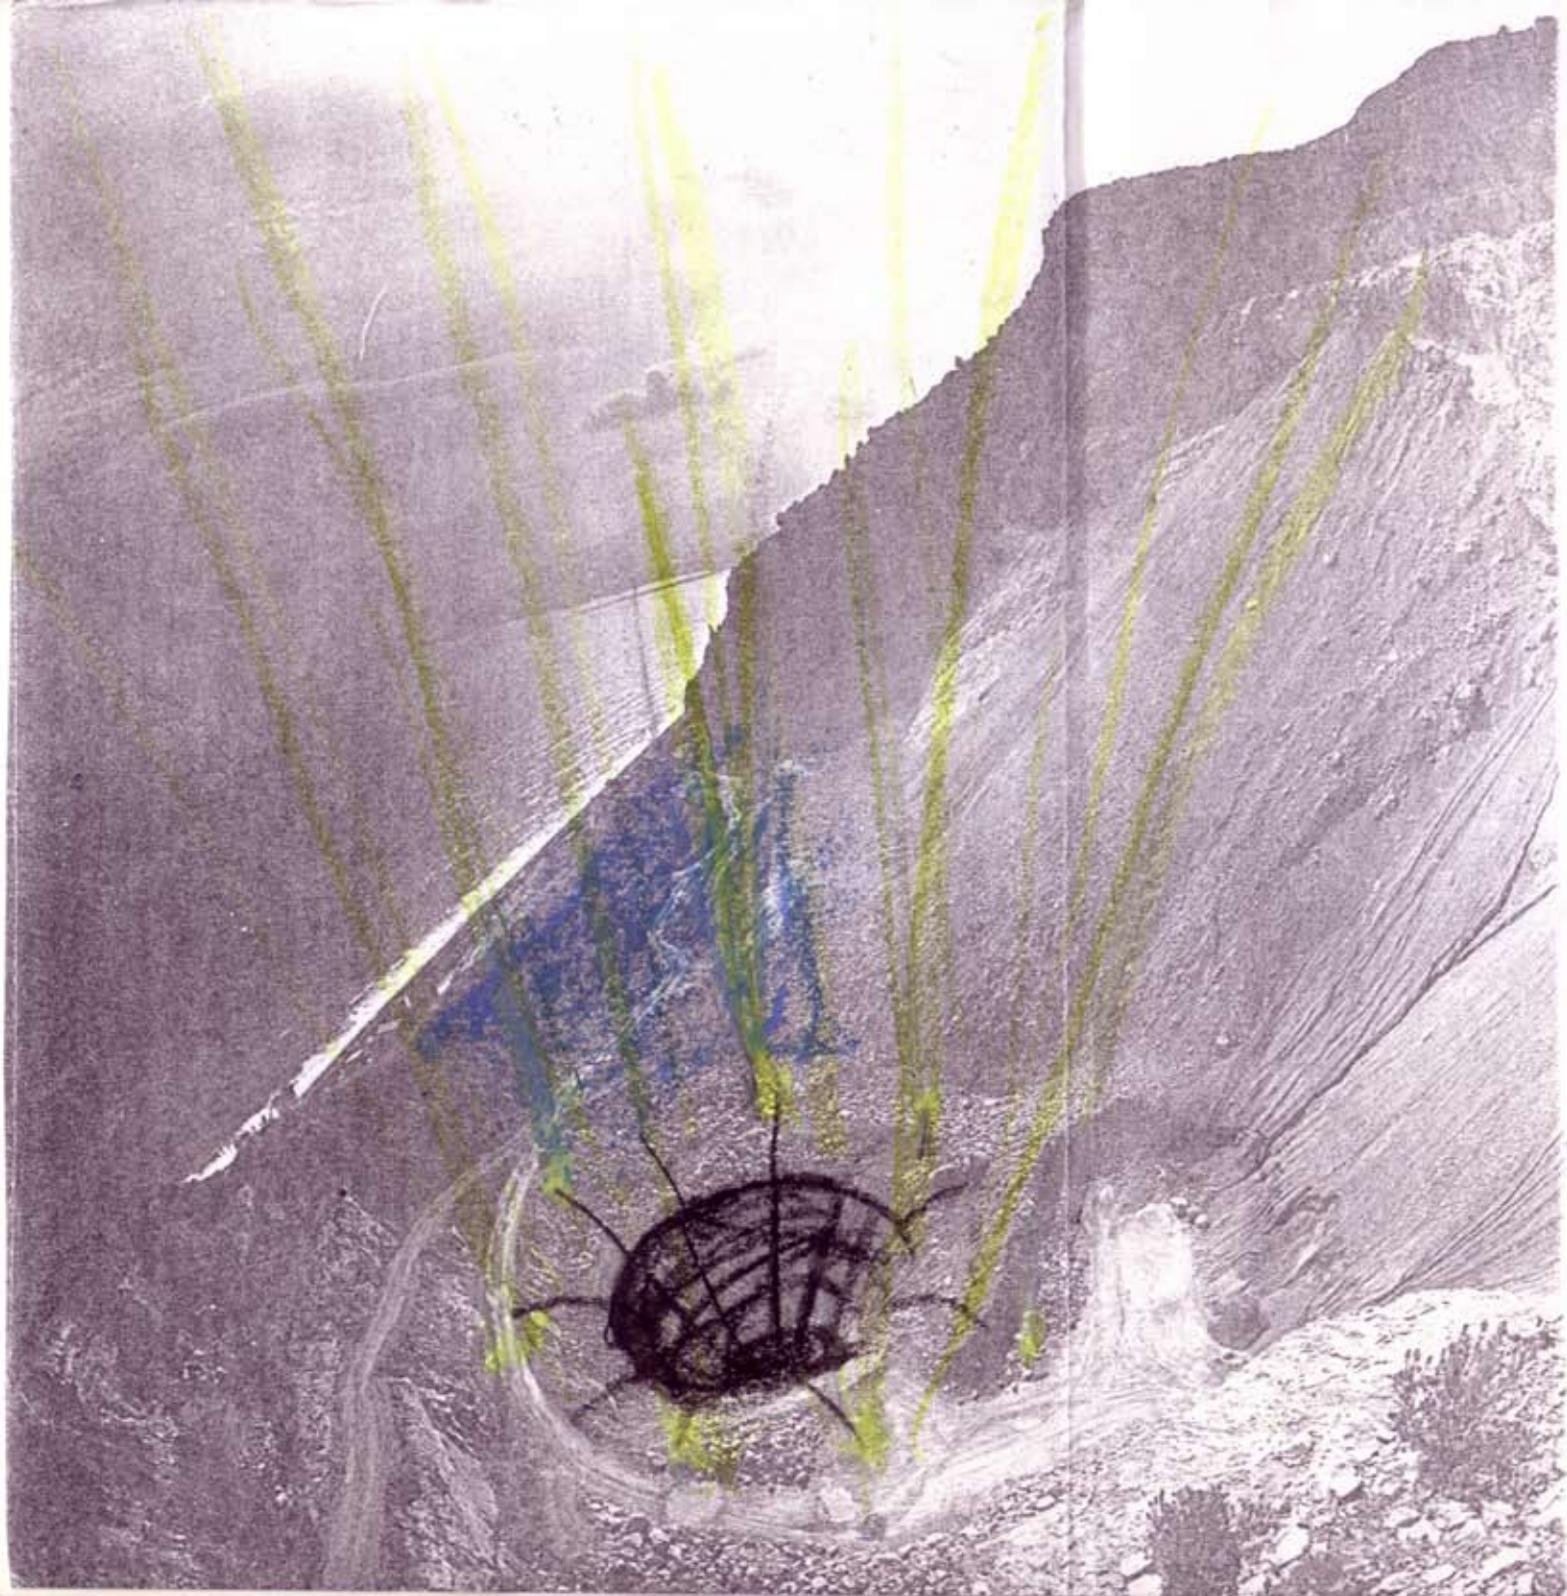

Handwritten notes at the top left of the page.
